

Petroleum Underground Storage Tank Remediation, Upgrade and Closure Fund

2018 Annual Report

The Petroleum Underground Storage Tank Remediation, Upgrade and Closure (UST) Fund, administered by the New Jersey Economic Development Authority (EDA) and the New Jersey Department of Environmental Protection (DEP), provides loans and grants to eligible owners and operators of regulated and non-regulated petroleum underground storage tanks to help finance project costs for the upgrade and closure of State regulated underground storage tanks and remediation of discharges from regulated and non-regulated underground storage tanks. Since its inception in 1997, the UST Fund has been one of the most popular and successful remediation incentive programs in New Jersey.

As of December 31, 2018, the net balance of the available funds in the UST Fund for non-leaking and leaking tanks was approximately \$5.3million, which reflects appropriations from FYs 2017, 2018, and 2019 still held in NJDEP accounts; \$2.9 million, \$7.9 million and \$8.4 million, respectively.

Effective May 3, 2011, the EDA and DEP temporarily suspended accepting new applications for non-leaking tanks due to insufficient funds – with the expectation that DEP and EDA approved projects would be processed upon availability of funds. For the leaking tank program, the DEP will continue to accept new applications, record their date received, and process them as sufficient funds become available.

Applications that are already in-house will be reviewed and processed by the DEP and EDA in the order that they were received and in accordance with statutory priority set forth in the Underground Storage Tank Finance Act (UST Finance Act), P.L. 1997, c. 235, N.J.S.A. 58:10A-37.1 et seq., specifically, N.J.S.A. 58:10A-37.4, until current funding is exhausted.

The EDA and the DEP report the results of activities for calendar year 2018 under the UST Fund in accordance with the UST Finance Act.

Background

On August 30, 1997, P.L. 1997, c. 235 was enacted establishing the UST Fund within the EDA and administered jointly with DEP.

The EDA accepts all applications directly for non-leaking residential underground storage tanks and, for leaking underground storage tanks, the DEP reviews applications to determine eligibility, reasonableness of costs and the scope of work needed to investigate and remediate discharges. The EDA manages the UST Fund and makes grants or loans to projects the DEP determines are eligible.

Initially, the UST Fund, along with the Hazardous Discharge Site Remediation Fund (HDSRF), received annual appropriations through the State's budget from the State Constitutional dedication of 4 percent of the Corporation Business Tax (CBT).

Beginning in 2006, a series of statutory revisions to the UST Finance Act greatly expanded the use of the UST Fund, opening it up to more categories of applicants, raising certain maximum grant and loan amounts, and increasing the financial eligibility thresholds required to qualify for grants. In 2007, a public ballot question was approved that redirected the annual CBT dedication from the UST Fund to other DEP programs, with the caveat that once the UST Fund balance went below \$20 million, the annual CBT dedication would be reinstated.

Between 2008 and 2011, the UST Fund did not receive an annual appropriation, as the balance of fund exceeded \$20 million. In 2012, the UST Fund resumed receiving an appropriation and the UST Fund continues to receive funding annually. In 2014, a public ballot question was approved, reducing the percentage of funding the UST Fund would receive annually. Between 2015 and 2019 the UST Fund received 9% of the 4% in CBT revenues the NJDEP was appropriated annually. Starting in 2019 the percentage the UST Fund received was reduced to 5%, however, this reduction was slightly offset by the NJDEP receiving 6% of the CBT revenues.

Overall UST Fund Activity

Since the program's inception in 1997, \$275.9 million have been appropriated to the UST Fund. In addition, the UST Fund received \$2.6 million in funding transferred from the Bureau of Underground Storage Tanks (BUST), and approximately \$76 million was received from grant and loan repayments, interest income, and fees, bringing the total amount of funding provided to approximately \$355 million.

Total disbursements from the UST Fund since the program's inception are more than \$23 million in loans, more than \$241 million in grants, incurred administrative costs of \$21 million, and \$60 million in transfers, in accordance with the UST Finance Act and other statutes, to State agencies and funds, including the Hazardous Discharge Site Remediation Fund (HDSRF).

As of December 31, 2018, and including recommendations from DEP regarding funding for leaking tanks, EDA closed a total of 17,926 projects totaling over \$259 million to provide assistance to businesses, private individuals and municipal and county governmental entities (See Exhibit A – UST Fund Detail).

2018 UST Fund Activity

In 2018, EDA closed 151 projects totaling over \$7.6 million, providing assistance to businesses, private individuals and municipal entities for the remediation of underground storage tanks. (See Exhibit B – 2018 Closed Activity) Additionally, in 2018, EDA approved 137 loans and grants totaling over \$8.9 million (See Exhibit C – 2018 Approved Activity). During this time period,

the EDA disbursed over \$10.7 million in grants and loans (See Exhibit D – 2018 Disbursements). *(Note: Although a project may have closed in a certain year, the disbursement of the funding obligated through the closing may come in a subsequent year; therefore, the funding amounts for closed projects may not be the same as the funding amounts disbursed in any given year).*

Below is a chart that summarizes the categories of outstanding commitments, i.e., projects approved but not closed, as of December 31, 2018.

Petroleum Underground Storage Tank Outstanding Commitments as of 12/31/18		
Type	Projects	Amount
County	0	0
Municipality	0	0
Business	15	\$2,120,002
Residential	22	\$1,020,065
Total	37	\$3,140,067

Assessment of Current Funding Levels to Meet Statutory Objectives

As of December 31, 2018, the UST Fund had approximately \$5.3 million remaining, which when combined with undisbursed portions of closed projects and fiscal year 2017, 2018 and 2019 receivables of \$19.4 million, totals \$24.7 million.

Attached are the charts referenced above. Should you need any additional information about the contents of this report, please contact the EDA at (609) 858-6767 or the DEP at (866) 337-5669.
